

Exceeding your expectations

Customer-driven technology consulting and management. When you decide to entrust someone with your core technology objectives, you count on reliability and objective advice. In fact, you expect it. Discover for yourself why we are one of the nation's leading technology consulting and management firms.

With Quest, your needs always come first and your ongoing success is our top priority. Gain directly from our experience with Fortune 50-5000 corporations, public and private education, and state and local government. You'll find a partner that values trust: Trust that builds a mutually confident relationship; and a relationship that will be sustained by exceeding your expectations.

Engage Quest. We offer one source confidence for all your technology needs.

Professional Services

Our team represents the best in current and emerging technologies. We have the talent and experience to fulfill your needs, offering expertise that includes:

- **Technology Consulting:** Optimizing your existing applications, infrastructure, security, internal processes and procedures
- **Project Management:** Bringing all elements of your project together for successful completion

Managed Services

Choosing a network health and security plan for your business is as easy as calling on our team of experts. We combine research, tools and leading technologies for:

- **Network Management**—optimizing your existing infrastructure and applications with accurate data, testing and custom reports
- **Managed Security**—incident protection services that cover your networks, servers, databases and applications 24/7
- **Data Storage and Co-location**—storage or server capacity augmentation inside a secure climate-controlled and seismically neutral environment
- **Business Continuity and Disaster Recovery**—safeguarding your systems and data in the event an interruption requires your company to seek data changeover, recovery and retrieval

Telecommunications & Transport

The convergence of voice and data has changed the way networks are being built and upgraded. From new installations to legacy systems, networks and applications, our team of experts can ensure your full integration.

Maintenance Contract Management

Choosing the optimum level of service for your hardware, software and equipment depends upon the needs of your business. We will assure the coverage of your mission-critical systems giving you the protection you require.

Fiber-optics, Wireless & Structured Cabling

Fast, flexible, dedicated, real-time and wireless are all a permanent part of the communications landscape. We can manage your complete point-to-point installation, from planning and design, to trenching, conduit and deployment.

Technical Staffing

Any new or ongoing initiative requires the appropriate knowledge base. Our team of staffing experts can find the qualified personnel you seek, with the technical knowledge, experience and aptitude your business demands.

Technology Products

To provide our customers with the most advanced technologies available, we maintain strategic partnerships with key manufacturers. We recommend only the most appropriate technologies anchored by seamless customer service.
